Skills

Languages: C++, JavaScript, C, PHP, Java, Python, SQL
Frameworks: HTML5, CSS, Bootstrap, Node JS, ReactJS, Express JS, React Native
Tools/Platforms: MySQL, MongoDB, Git, GitHub, Linux
Soft Skills: Detail-Oriented, Problem Solving, Collaborator, Adaptability, Communication, Keen Learner

Projects

ViceCity | **GitHub** Nov' 25 – Dec' 25

- Developed a full-stack Smart City platform with role-based dashboards for citizens, attraction managers, and administrators, streamlining access to 10+ city services in a unified system.
- Designed and integrated JWT-based authentication with protected routing and privilege-level authorization, securing 25+ backend API endpoints and reducing unauthorized access risks.
- Built scalable REST APIs and optimized MongoDB data handling to improve application response efficiency and support concurrent multi-user interactions.
- Integrated an AI-powered chatbot using external APIs to deliver real-time city assistance, reducing manual query handling and enhancing overall user engagement and support accessibility.
- **Tech:** React.js, Express.js, MongoDB, Node.js, Tailwind CSS

Habit Tracker | **GitHub** Jun' 25 – Jul' 25

- Crafted a full-stack habit tracking application enabling users to monitor daily activities, maintain streaks, and manage routines through an intuitive and responsive interface.
- Implemented features such as daily habit logging and calendar-based heatmap visualization, improving habit consistency tracking and increasing user engagement through clear progress representation.
- Engineered analytics modules to provide streak insights, completion trends, and activity statistics, helping users make data-driven improvements to their routines.
- Optimized frontend responsiveness and user workflow for seamless interaction across devices, delivering a smooth experience for long-term habit management and self-improvement.
- **Tech:** ReactJS, Node JS, Express JS, MongoDB, CSS, APIs

Farmer's Portal | **GitHub** Feb' 25 – May' 25

- Created a platform for farmers to list their products and sell at competitive prices while enabling retailers to purchase goods efficiently.
- Delivered features such as produce listings, a simplified bidding system for retailers, and dashboards displaying purchase history and bidding statistics, all built with a clean and intuitive interface.
- Streamlined the buying and selling process, allowing farmers to get better value for their goods and helping retailers make informed purchasing decisions.
- Improved transparency, usability, and efficiency in farmer–retailer interactions through an easy-to-navigate platform.
- **Tech:** HTML5, CSS, PHP

Certificates

- Cloud Computing by NPTEL | Certificate — Oct' 25
- ChatGPT-4 Prompt Engineering: ChatGPT, Generative AI & LLM by Infosys | Certificate — Aug' 25
- Full Stack Web Development with MERN by CipherSchools | Certificate — Jul' 25

Achievements

- Cleared GATE CS with rank **1454** | Certificate — Apr' 26
- Cleared GATE MA with rank **1639** | Certificate — Apr' 26

Education

Lovely Professional University — Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; **CGPA: 7.89** — Aug' 23 – Present

Kendriya Vidyalaya Miran Sahib — Jammu, Jammu & Kashmir
Intermediate; **Percentage: 84%** — Apr' 22 – Mar' 23

Kendriya Vidyalaya Bhaderwah — Jammu, Jammu & Kashmir
Matriculation; **Percentage: 87%** — Apr' 20 – Mar' 21
